1 C++ Fundamentals

1.1 Contents

- Problems, Algorithms, and Programs
- Project Organization, Code Refactoring & Header Files
- Data, Types and Variables
- Standard Input and Output
- Data Types and Basic Operations
- Data Types and Type Casting/Conversion
- Namespaces and Enumerations
- Memory Segments
- Pointers
- Libraries and Functions
- User Defined Functions
- Unittesting with doctest
- Conditionals
- Loops
- Strings
- Regular Expressions
- Arrays & C-strings
- File Input and Output
- Pair and Tuples
- Recursion
- Standard Template Library (STL) Overview
- Vector Containers
- Sequence Containers: Deque, List, Forward List, Array
- Container Adapters: Stack, Queue, Priority Queue
- Algorithms Library Overview
- Maps and Unordered Maps
- Sets and Unordered Sets
- Data Structures
- Classes and Objects
- Union Datastructure

1.2 Miscellaneous

- Dev Environment & Setup
- Makefile

- [Jupyter Notebook & Setup](#)
- [Kattis Online Judge & Problem Bank](#)
